

JavaScript *for* Developers

DataType: Set

Set

Set is a collection of unique values

```
arr = [ 0, 1, 1, 4, 3, 2, 2, 0, 1 ]
```

```
set = [ 0, 1, 4, 3, 2 ]
```

APIs

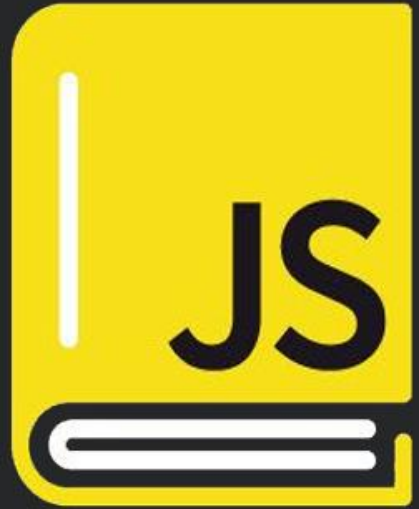

- ✓ No literal object | Must create by **new** operator
- ✓ **add(e)** adding **e** to the **set**
- ✓ **delete(e)** remove **e** from the **set**
- ✓ **has(e)** check if **e** exist in the **set** or not
- ✓ **size** number of element in the **set**
